About Us

Combining the skills of industry professionals with decades of experience across various industries, National Safety Products are proud to bring work site safety solutions to your door. With a network covering the whole of Australia, we stock and supply a broad range of safety equipment for various sectors including construction, utilities, rail, civil engineering, local government, traffic management, street works and more.

The supply of good quality and compliant products at competitive rates sets the theme for everything that National Safety Products do. Customer Service is at the heart of our operations and we value the interactions with our customers.

The particular range of product we display in this brochure focuses on Oxford Plastics products, brining you a range of road plate systems, trench covers, barrier options and ground protection to ensure the safest possible outcomes. The Oxford Plastics range make it easy for you to comply with the Work Health & Safety Act 2012 as outlined next page.

Looking forward to discussing your next safety requirements.

National Safety Products Team.

Does your work site comply?

Work Health and Safety Act 2012

Part 4—Falls

78—Management of risk of fall

A person conducting a business or undertaking at a workplace must manage, in accordance with Chapter 3 Part 1, risks to health and safety associated with a fall by a person from one level to another that is reasonably likely to cause injury to the person or any other person.

A person conducting a business or undertaking must ensure, so far as is reasonably practicable, that any work that involves the risk of a fall to which subregulation (1) applies is carried out on the ground or on a solid construction.

In this regulation solid construction means an area that has:

- (a) a surface that is structurally capable of supporting all persons and things that may be located or placed on it; and
- (b) barriers around its perimeter and any openings to prevent a fall; and
- (c) an even and readily negotiable surface and gradient; and
- (d) a safe means of entry and exit.

Also available in our range of site safety solutions:

- Signage (Temporary & Permanent)
- Cones & Accessories
- Bollards (Temporary & Permanent)
- Intelligent Traffic Systems (VMS Trailers, Speed Radars, Arrowboards, Vehicle Activated Signage
- Cable Covers

LowPro 23/05 Road Plate

The 23/05 LowPro Road Plate is a modular system of single linking units which are suitable for 44 tonne vehicles over trenches up to 1200mm wide. They can be deployed in minutes by two people and require no heavy lifting equipment or machinery

Features and Advantages

- Complies with Australian Standard 3996 and 1428
- Heavy-duty modular road plate for highways and pavements
- Suitable for 44T vehicles over a 1200mm trench
- 2 person lift using EasiLift handles
- Drop-pins prevent lateral movement
- Moulded anti-slip surface
- Hi–Vis yellow encourages traffic calming
- Patented Flexi-edges reduce noise pollution
- Faster than installing steel plates
- Available with stillage
- Spare parts available
- Designed & manufactured in the UK

No expensive machinery neccesary

The LowPro 23/05 can be installed manually

Anti-slide function

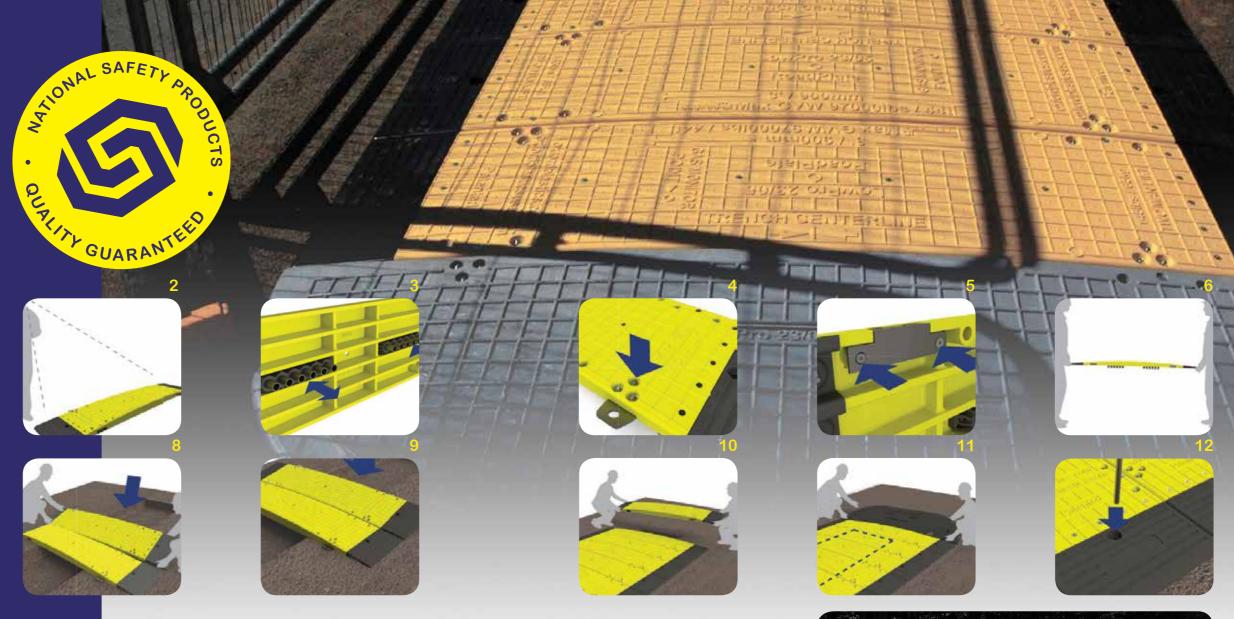

The anti-slide technology, on the underside and edges of the road plate, is made from a soft, flexible, rubber material which grips the surface reducing unwanted movement. Rubber edges can be replaced to extend the life of your LowPro.

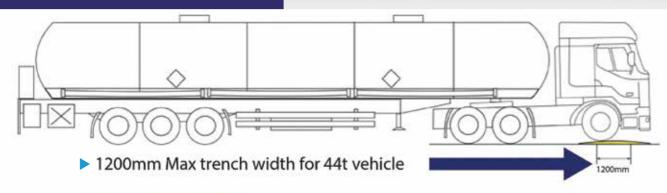

No complaints

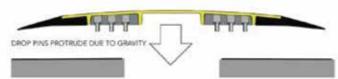

The anti-slip surface provides secure access, and hi-vis yellow alerts drivers to reduce their speed. The Road Plate is currently used in highways, Street Works and Utilities sites. The innovative and patented Flexi-Edge reduces noise pollution, making the LowPro 23/05 Road Plate ideal for residential areas. The 23/05 LowPro must be bolted down for carriage-way use.

LowPro 15/05 Road Plate

There's no need for heavy lifting equipment as the road plate weighs only 42kg and can be installed in minutes with only two people. The integrated anti-skid surface, which exceeds current road plate standards, provides positive traction, for both vehicle and pedestrian traffic. The innovative flexible edge reduces unwanted noise, improving quality of life in residential areas.

和四周,是

Features and Advantages

- Complies with Australian Standard 3996 and 1428
- Heavy-duty modular road plate for highways and pavements
- Suitable for 44T vehicles over a 700mm trench
- 2 person lift

ANIONAL SAFETY

- Drop-pins prevent lateral movement

LowPro 15/10 Driveway Board

This product has been designed to support a load of one wheel of a 3.5t vehicle, over a 900mm span, & to use the LowPro technology. In most site configurations the product will not need to be fixed in place which reduces installation time and reduce costs of reinstatement, reducing the need to use steel plates in driveway applications.

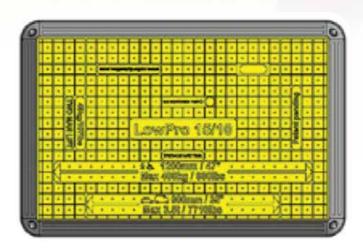

The increased loading and design also enables the product to be used in pedestrian applications that require a span up to 1200mm. The new design, developed in collaboration with Utilities and Contractors alike, provides a single product that works in multiple applications.

Ensures your site complies with the Work Health & Safety Act 2012 s.78

Features and Advantages

- Complies with Australian Standard 3996 and 1428
- Award-winning, 2 person-lift Driveway Board
- Suitable for 3.5T vehicles over a 900mm trench & pedestrians over a 1200mm trench
- LowPro edges grip the asphalt –pinning not required in most applications
- Moulded anti-slip surface
- Fitted with gas vents & probe hole
- Shock resistant
- Use with LowPro Infill to remove trip-hazards
- Corporate branding available
- Designed & manufactured in the UK

The underside and edge of the Low Pro 12/8 are made from a soft flexible material which grips the surface underneath the board and helps to reduce any unwanted movement as it is anti-slide, non-pinned and self-weighted. Its innovative design reduces installation time as there is no need to bolt the product down, but is still very stable. Rubber edges can be replaced to extend the life of your LowPro.

Ensures your site complies with the Work Health & Safety Act 2012 s.78
